GAS™

Gasoline Approval System

Pump Up Your Profit
by Controlling Expense.

PROBLEM:

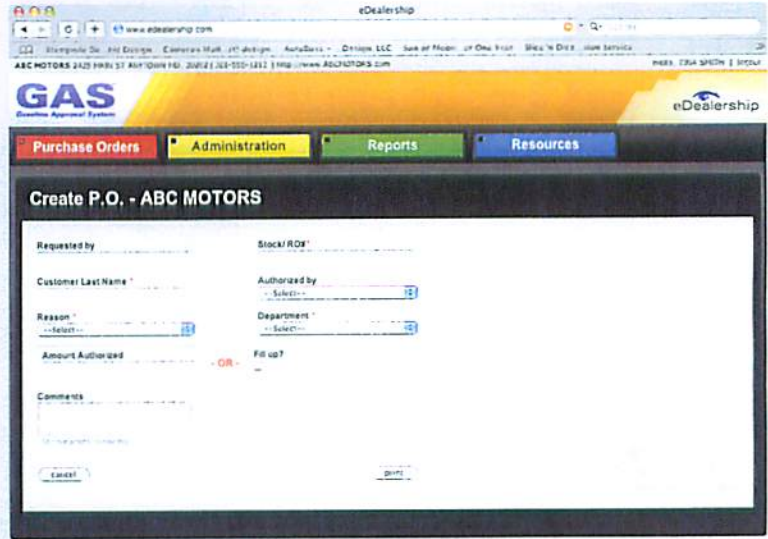

Auto dealerships spend thousands every month on gasoline — but have no way to accurately control or reconcile this expense.

1

TAKE CONTROL

Create Detailed Gas Purchase Orders. The Gasoline Approval System **GAS™** enables you to produce comprehensive gas tickets with all the necessary data to take control of your process.

2

ORGANIZE RECORDS

Verify GAS™ Tickets with Gas Station Receipts. Gas station receipt data can be entered into **GAS™** to complete and record each transaction. **GAS™** eliminates the end of month stack of receipts that are impossible to reconcile by creating detailed purchase orders (gas tickets) and office control copies.

“There are a lot of controls in accounting but many don't get managed. The hardest part about management controls is the leg-work on the accountability side. GAS totally automated our gasoline management control. Reconciling our gasoline expense each month takes less than 20 minutes and has reduced our average monthly expense by more than 20%.”

Tony Guglielmi, Comptroller, 355 Toyota & Nissan,
Rockville, Maryland

PROTECT YOUR BOTTOM LINE

Easy Reconciliation Eliminates Fraud, Theft, Error, and Waste. Detailed transaction records close the loop on open-ended expenses. The patented GAS™ software method reconciles all of your transaction data with your gas station billing.

"When I first heard about GAS, I really had no idea what our actual expense was per month. I never imagined the kind of fraud and waste that existed in my store. You get so busy with the daily routine, that the gas tickets you sign are the last thing on the radar. The 15 seconds that it takes per gas ticket reduced my expense by more than 30%."

Alen Baik, General Manager, Lexus of Silver Spring,
Silver Spring, Maryland

4

MANAGE EXPENSE

Track the Details of Every Transaction. Monitor your gasoline expenses in real time with searchable options and a variety of reports that will provide detailed information by category for each purchase, including department, employee, customer, reason, vehicle, amount, and authorization.

If you're ready to move your business into the fast lane, you'll need GAS™!

SOLUTION:

GAS™
Gasoline Approval System

GAS™ brings Dealer Gasoline Accounting into the 21st century by automating your management controls. Increase profit by decreasing your expense.

This user-friendly system has a proven track record of finding and fixing expensive leaks in dealership processes.

ASK YOURSELF ...

What is your dealership's average monthly gasoline expense?

What is 20% of that total?

Would you like that much extra profit added to your bottom line every month?

Pump Up Your Profit by Controlling Expense.
